Dear ,

I read and am interested about your advertisement in the website for an Entry-level Software Engineer. Please accept this letter and the enclosed resume as my application for this position.

As a recent Computer Science graduate of Calicut University, I have solid knowledge of a variety of operating systems, software development tools, and file systems as well as practical experience in these areas. In addition, I found that my problem-solving skills were enhanced by working as part of a team and by considering other people's ideas.

Company is a leader in creating data storage solutions, while at the same time being a small, focused enterprise. Both of these qualities appeal to me greatly. I am actively seeking the kind of challenge offered by working for a technically innovative firm that is small enough to be flexible in response to the market.

I am eager to have the chance to discuss this position with you in an interview. Please contact me . Thank you for your attention, and I look forward to hearing from you.

Sincerely

Anu N A

OBJECTIVE

As a beginner in the field of Information Technology, I strive to associate myself with an organization where I can utilize my skills in the best possible manner, which further gives me an opportunity to grow in my career journey while contributing to the development of the organization. I seek challenging opportunities where I can fully use my skills for the success of the organization. Demonstrated ability to learn quickly and work well as part of a team or independently as needed, with effective communication across all company levels.
